

fdgdfgfgfgfdg

I Have 02 files (New Titles Sheet) and (Tag Sheet). In ?new titles sheet? in (column B) product description is written please read that and then create Tags in Column G NewTags from (Tag sheet).

Read the product descriptions in Column B of the "Title Sheet".

Using the "Tags Sheet" file as a reference, generate relevant and specific new tags for each product description. Write these new tags into Column G ("New Tags") of the "Title Sheet" table. Ensure the tags are concise, descriptive, and aligned with the product features or category.

Only use tags that exist in the Tag File.

If a tag is found in the Tag Sheet, add it to Column G of the New Titles Sheet.

If no match exists, leave Column G blank ? no extra or invented tags allowed.

Output must be chunked into 20 rows per CSV reply.

Please share CSV in chunks of 20 within reply to this chats
