ISSUE #VA-28098

Visible focus indicator is missing

 Remediated by UserWay's Pro Widget

Desktop

AA

High

Found on 74 pages

Description:

Checks for a visual focus indicator. By default, browsers display a visual indicator of focus. In most browsers, a dotted outline appears surrounding the element that has focus as users press Tab to navigate the page. When the CSS `outline` property is set to none or to 0 (zero), this visual indicator of focus is removed, making keyboard navigation virtually impossible. Unfortunately, many commonly-used templates and content management systems set the CSS outline property to none, relying on the site developer to reinstate it.

Affected Code:

```
<a href="/pages/watches" class="mobile-nav__link" aria-label="Watches" role="heading" aria-level="1" data-uw-rm-ac="" data-uw-rm-brl="PR" data-uw-original-href="/pages/watches" tabindex="-1">Watches</a>
```

WCAG (AA) Standard:

<https://www.w3.org/WAI/WCAG21/Techniques/failures/F78>

Recommended Action:

Style the CSS `outline` property to provide a visual indicator of focus for users who rely on keyboards to navigate.

ISSUE #VA-28081

Links with identical targets have different descriptive text

 Remediated by UserWay's Pro Widget

Desktop

Mobile

AA

Med

Found on 79 pages

Description:

Checks that links with identical `href` attributes have identical descriptive text (link text). When multiple links to the same target exist, the descriptive text for each should be identical to avoid confusing users who rely on screen readers or other assistive technologies.

Screenshot:

Affected Code:

```
<a href="/collections/love-spell%C2%AE" class="mobile-nav__link" data-uw-rm-brl="PR" data-uw-original-href="/collections/love-spell%C2%AE" tabindex="-1">Love Spell<sup class="text-tm" aria-hidden="true">®</sup></a>
```

```
<a href="/collections/love-spell%C2%AE" data-uw-rm-brl="PR" data-uw-original-href="/collections/love-spell%C2%AE"> ...</a>
```

```

WCAG (AA) Standard:

<https://www.w3.org/TR/UNDERSTANDING-WCAG20/consistent-behavior-consistent-functionality.html>

Recommended Action:

Where multiple links share identical `href` attributes, ensure that the link text is identical. Alternatively, add an identical aria-label for all link that have the same `href` attribute.

Issue #VA-52276

This issue was first identified on 23-Jun-2026 on the following page:

<https://www.vallianijewelers.com/pages/jobs>

ISSUE #VA-52276

Visible focus indicator is missing

 Remediated by UserWay's Pro Widget

Desktop

AA

High

Description:

Checks for a visual focus indicator. By default, browsers display a visual indicator of focus. In most browsers, a dotted outline appears surrounding the element that has focus as users press Tab to navigate the page. When the CSS `outline` property is set to none or to 0 (zero), this visual indicator of focus is removed, making keyboard navigation virtually impossible. Unfortunately, many commonly-used templates and content management systems set the CSS outline property to none, relying on the site developer to reinstate it.

Affected Code:

```
<a href="/collections/rings" class="mobile-nav__link" data-uw-rm-brl="PR" data-uw-original-href="/collections/rings" tabindex="-1">Rings</a>
```

WCAG (AA) Standard:

<https://www.w3.org/WAI/WCAG21/Techniques/failures/F78>

Recommended Action:

Style the CSS `outline` property to provide a visual indicator of focus for users who rely on keyboards to navigate.

Issue #VA-49849

This issue was first identified on 22-Jun-2026 on the following page:

<https://www.vallianijewelers.com/pages/jobs>

ISSUE #VA-49849

Page should have a single element

 Remediated by UserWay's Pro Widget

Desktop

Mobile

AA

Med

Description:

Checks that the page has a single `<h1>` element. Structuring pages with a logical and predictable heading hierarchy allows users to easily find information and more efficiently navigate the page. Users relying on screen readers and other assistive technologies should be able to understand the page structure by quickly skimming the page. Each page should have a single `<h1>` element under which all subsequent headings (`<h2>`, `<h3>`, etc.) should semantically fit.

Screenshot:

Affected Code:

```
<h1 class="careers-hero__heading" role="heading" aria-level="1" data-uw-rm-heading="level">Be a Part of Valliani</h1>
```

```
<h1 role="heading" aria-level="2" data-uw-rm-heading="level">About Us</h1>
```

```
<h1 role="heading" aria-level="2" data-uw-rm-heading="level">What We Offer Our Team</h1>
```

```
<h1 role="heading" aria-level="2" data-uw-rm-heading="level">Benefits</h1>
```

```
<h1 role="heading" aria-level="2" data-uw-rm-heading="level">Job Type</h1>
```

```
<h1 role="heading" aria-level="2" data-uw-rm-heading="level">Work Location</h1>
```

WCAG (AA) Standard:

<https://www.w3.org/WAI/tutorials/page-structure/headings>

Recommended Action:

Change, add, or remove headings to maintain a logical hierarchy of headings that begins with a single `<h1>` element.

## Element lacks adequate color contrast

 Remediated by UserWay's Pro Widget

Desktop

AA

High

### Description:

Checks for a contrast ratio of 4.5:1 between text and background. Any text (or image that contains text) must have a color contrast ratio of 4.5:1 or higher for small to normal-sized text to be readable by users with low vision and to meet WCAG AA level guidelines. For larger text, the contrast ratio must be 3:1 or higher. To meet WCAG AAA level guidelines, the contrast ratio must be 7:1.

### Screenshot:

### Affected Code:

```

```

### WCAG (AA) Standard:

<https://www.w3.org/WAI/WCAG21/Understanding/contrast-minimum.html>

### Recommended Action:

Change background or foreground colors (or both) to achieve the needed contrast ratio (4.5:1 for AA or 3:1 for AA of non-text elements, 7:1 for AAA). Always verify contrast ratios using UserWay's contrast checker at <https://userway.org/contrast>.

Med

### Description:

Checks that links with identical `href` attributes have identical descriptive text (link text). When multiple links to the same target exist, the descriptive text for each should be identical to avoid confusing users who rely on screen readers or other assistive technologies.

### Screenshot:

### Affected Code:

```
...
```

```
...
```

## WCAG (AA) Standard:

<https://www.w3.org/TR/UNDERSTANDING-WCAG20/consistent-behavior-consistent-functionality.html>

---

## Recommended Action:

Where multiple links share identical `href` attributes, ensure that the link text is identical. Alternatively, add an identical `aria-label` for all link that have the same `href` attribute.
